

Vanessa: Stopping morning phone use

Presentation and Product by

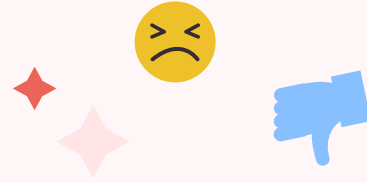

Ruby Xu

Asa Weinstein

Gemsly Cajuste

Z(oe) Schurman

Waking Up

The way that we wake up is extremely important. It sets the tone for the rest of the day and has impact on our energy, mood, and feeling.

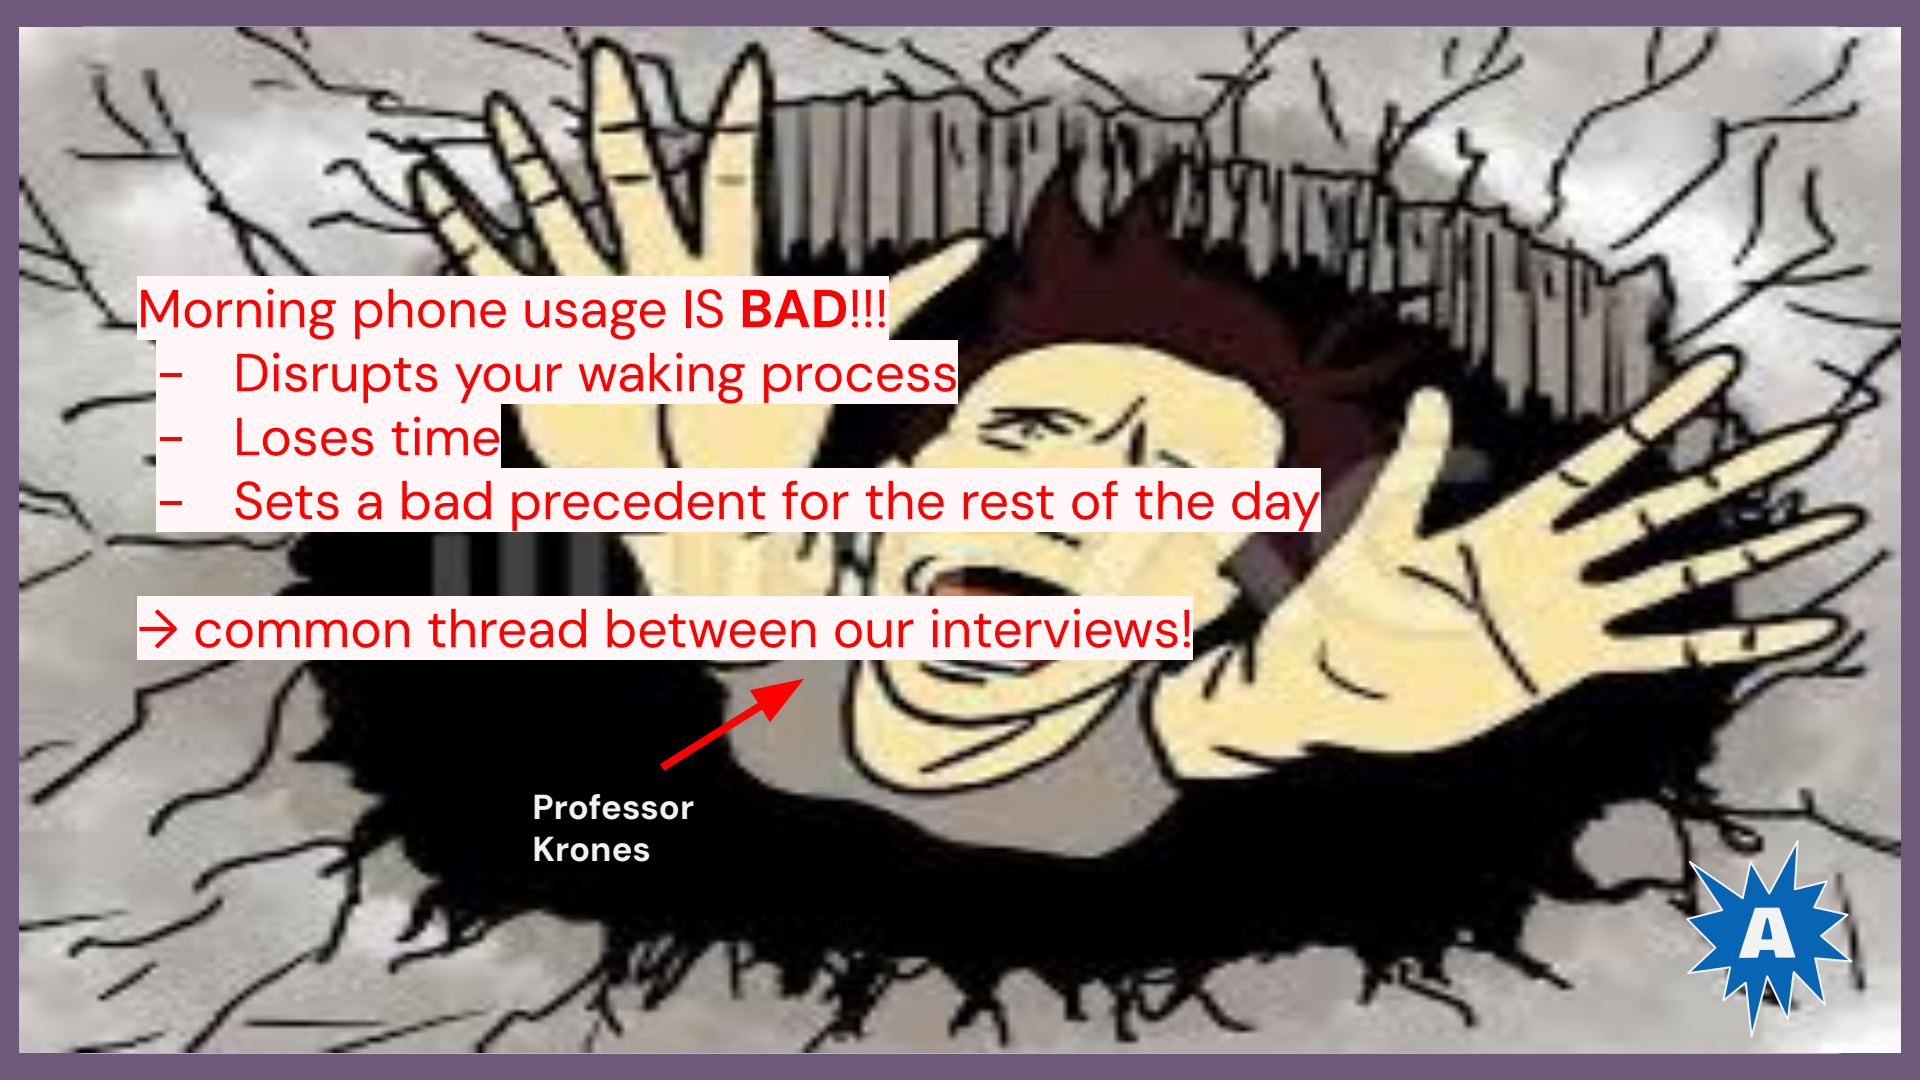

Why then do so many people choose to wake up like this...

Has this ever happened to you?

Professor
Krones

Morning phone usage IS **BAD!!!**

- Disrupts your waking process
- Loses time
- Sets a bad precedent for the rest of the day

→ common thread between our interviews!

Professor
Krones

HOW MIGHT WE'S

01

HOW MIGHT WE...

address people's reflex of reaching for their phone in the morning?

02

HOW MIGHT WE...

prevent unhealthy phone use right after waking up?

THE SOLUTION

We needed a...

1. Physical intervention
→ Interviews supported this
2. Localized to the morning
3. With customizability

VANESSA: *UNLOCK YOUR LIFE!*

3 ASPECTS OF OUR PRODUCT

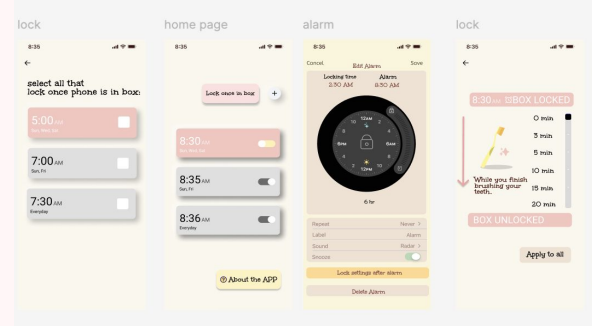

Case

- 1) Physical intervention

TOOTHBRUSH SENSOR

- 2) Localized to the morning

APP

- 3) gives everything else customizability

USAGE STORYBOARD

1: The Night Before

Set alarm + put phone in locking case

2: Alarm goes off

Case locks!

3: User Brushes Teeth

The Toothbrush is placed back down

4: Box Unlocks

The Phone can be taken out

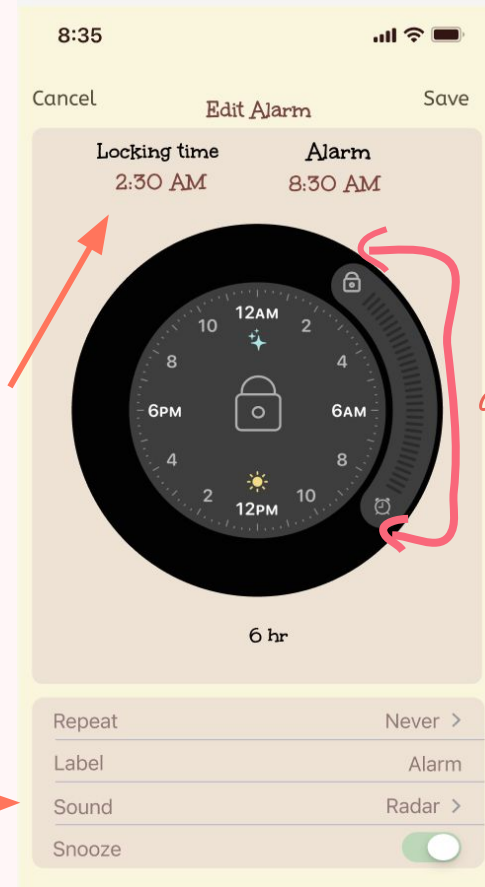

Design Details

App features

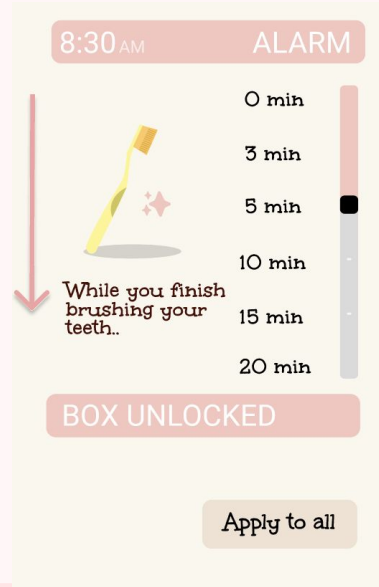

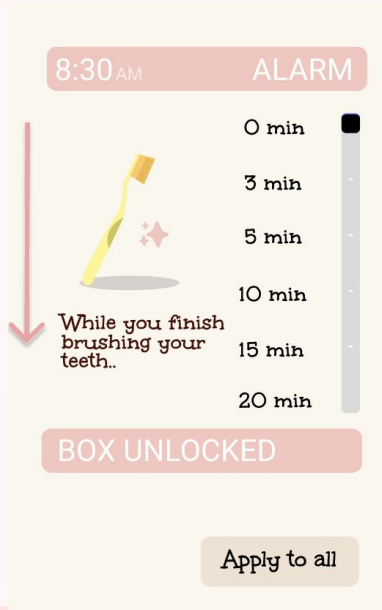

1. Set the Locking and Alarm time:

Alarm customization:

App features

2. Set the locking minutes after alarm

App features

3. If you want the phone to be locked once in box:

select all that
lock once phone is in box:

5:00 AM
Sun, Wed, Sat

7:00 AM
Sun, Fri

7:30 AM
Everyday

Lock once in box

8:30 AM
Sun, Wed, Sat

8:35 AM
Sun, Fri

8:36 AM
Everyday

🔗 About the APP

Play around with the app!

PHYSICAL DESIGN FEATURES

DESIGN FEATURES - BUTTON

**1) Emergency Function
when held for 7 sec.**

2) Stops the Alarm

...

DESIGN FEATURES - CHARGING PORT

Self explanatory!

DESIGN FEATURES - LATCH/LOCK

Currently, a latch. If iterated on, would be replaced with electronic lock!

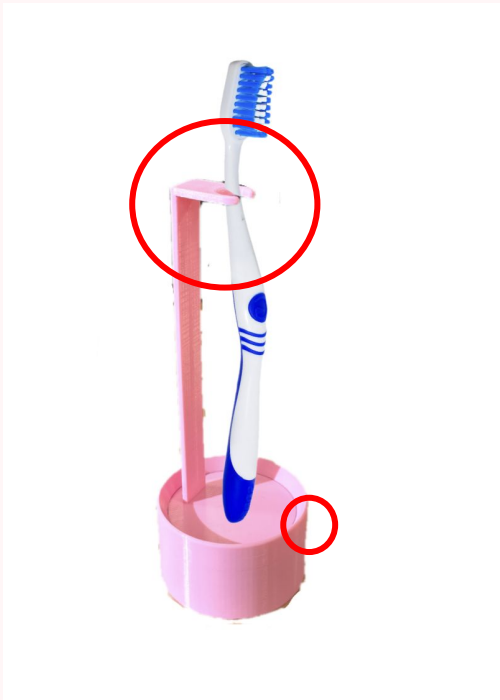

DESIGN FEATURES - FACE

- **Transparent so you can see but not interact**
 - **Allows you to identify cases of emergency**

DESIGN FEATURES - HOLDER

- **Top supports toothbrush**
- **Rim catches any excess water**
- **Easy to clean**

...

DESIGN FEATURES - WEIGHT SENSOR

- **Connects and controls the locking mechanism of the box**
- **Shields electronics from water**

How to make your own Vanessa?

Things we provide:

- ◆ - Files of the prototype of lock box in Fusion 360.
- - The app prototype in Figma.

Things you need:

- **A locking box:** Customize the box model for your phone's size, incorporate electronics that connecting the app with lock.
- **A weight sensor.**
- **Digital Tools:** Fusion 360, App development framework, Microcontroller Programming.

Tips

1. Prototyping:

Use Figma to design and test your app's user interface before coding. Use Fusion to design your prototype before making the real product.

2. Testing:

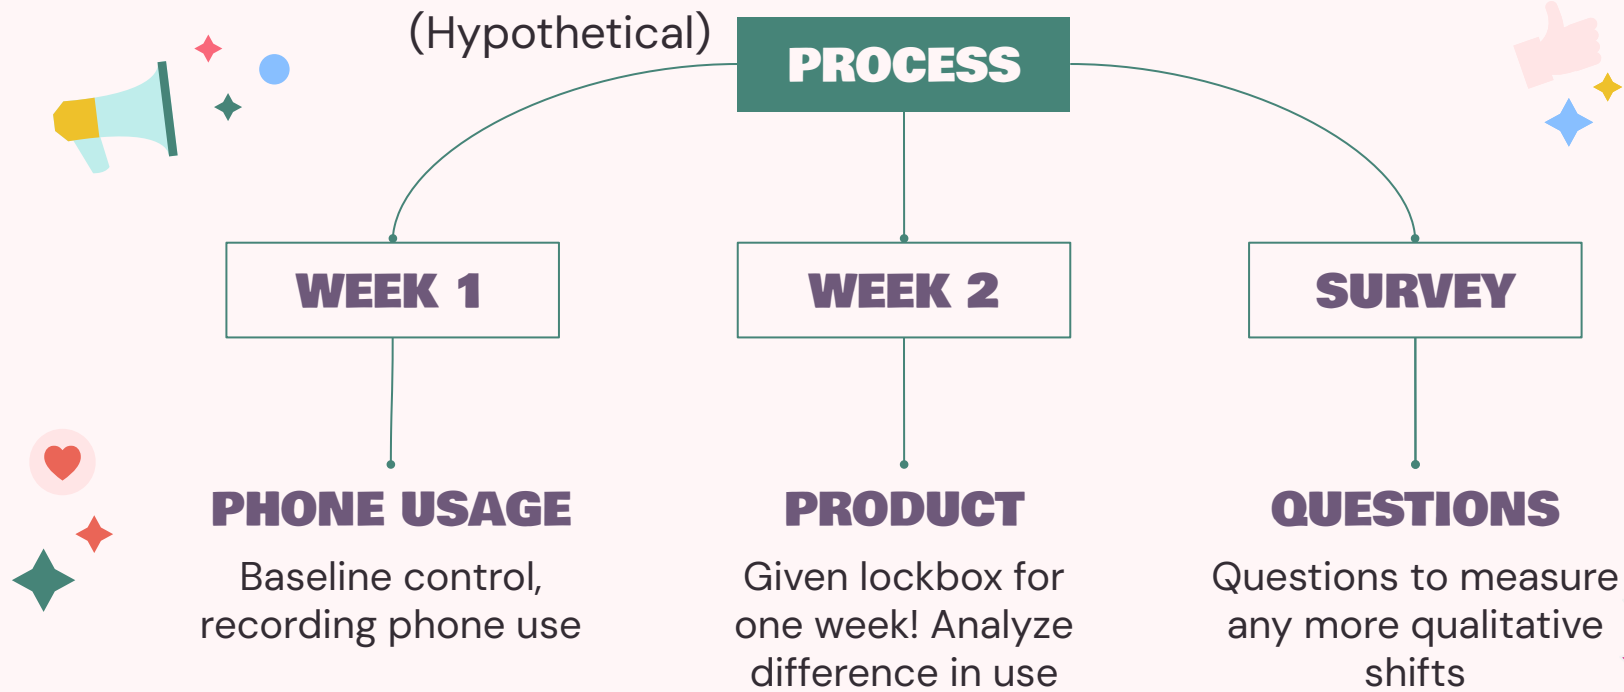

Conduct thorough testing to calibrate the weight sensor and locking mechanism.

3. Customization:

Personalize the box's dimensions and design using Fusion.

FEEDBACK/TESTING

Reflections on what we actually did

Interviews! Observations:

- Started off unsure about if it was even a problem
- Once explained, tended to be excited
 - all said they would use >65% of the time

Uncovered unexpected applications!

- Limiting night usage
- Helping routine, especially when mental health goes downward

Overarching themes!

Accessibility!! Super intertwined

- Phones are *too* physically accessible
- Apps are too accessible

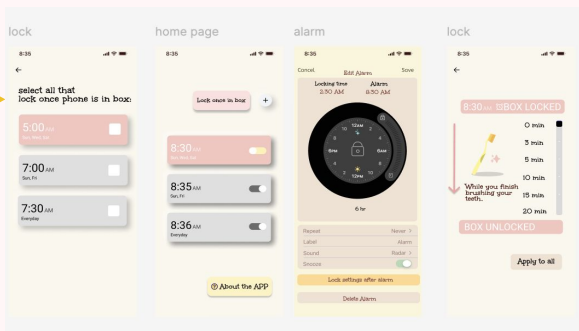

More specifically, let's relate this to Sara Hendren.

→ Didn't think about disability, and in that, missed a lot more folks!

3 Failure Points:

APP

- 1) Apple-y interface
- 2) Visual disability accessibility
- 3) Motor accessibility

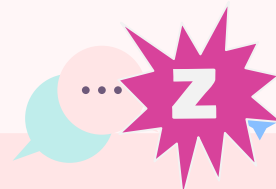

TOOTHBRUSH SENSOR

- 1) REALLY BAD!! Multiple reasons the same motion is hard!

Case

- 1) Plugging in
- 2) LOCK!! IMPORTANT!!!

Drilled it in!

THANK YOU
