A cartoon illustration of a skeleton with a pumpkin for a head. The pumpkin has a carved face with large, dark eyes and a wide, open mouth. The skeleton is wearing a white shirt and a white tie, and is holding a small, round object in its right hand. The background is a plain, light-colored surface.

Mini-lesson:

Creating 3D models with an AI tool-

Tripo AI version v2.0-20240919

Setting

A grid of 3D rendered cats. The top row shows two cats from a top-down perspective. The bottom row shows three cats from a front-facing perspective. The first cat on the left wears a red Santa hat. The middle cat wears a blue and red striped hat with a pom-pom and a blue scarf. The third cat wears a blue hat with yellow and orange patterns. The background is dark with light gray grid lines.

Paint-on seam

Did you know that you can paint directly on the object and select where to place the start/endpoint of each perimeter loop? Try the **Seam painting**

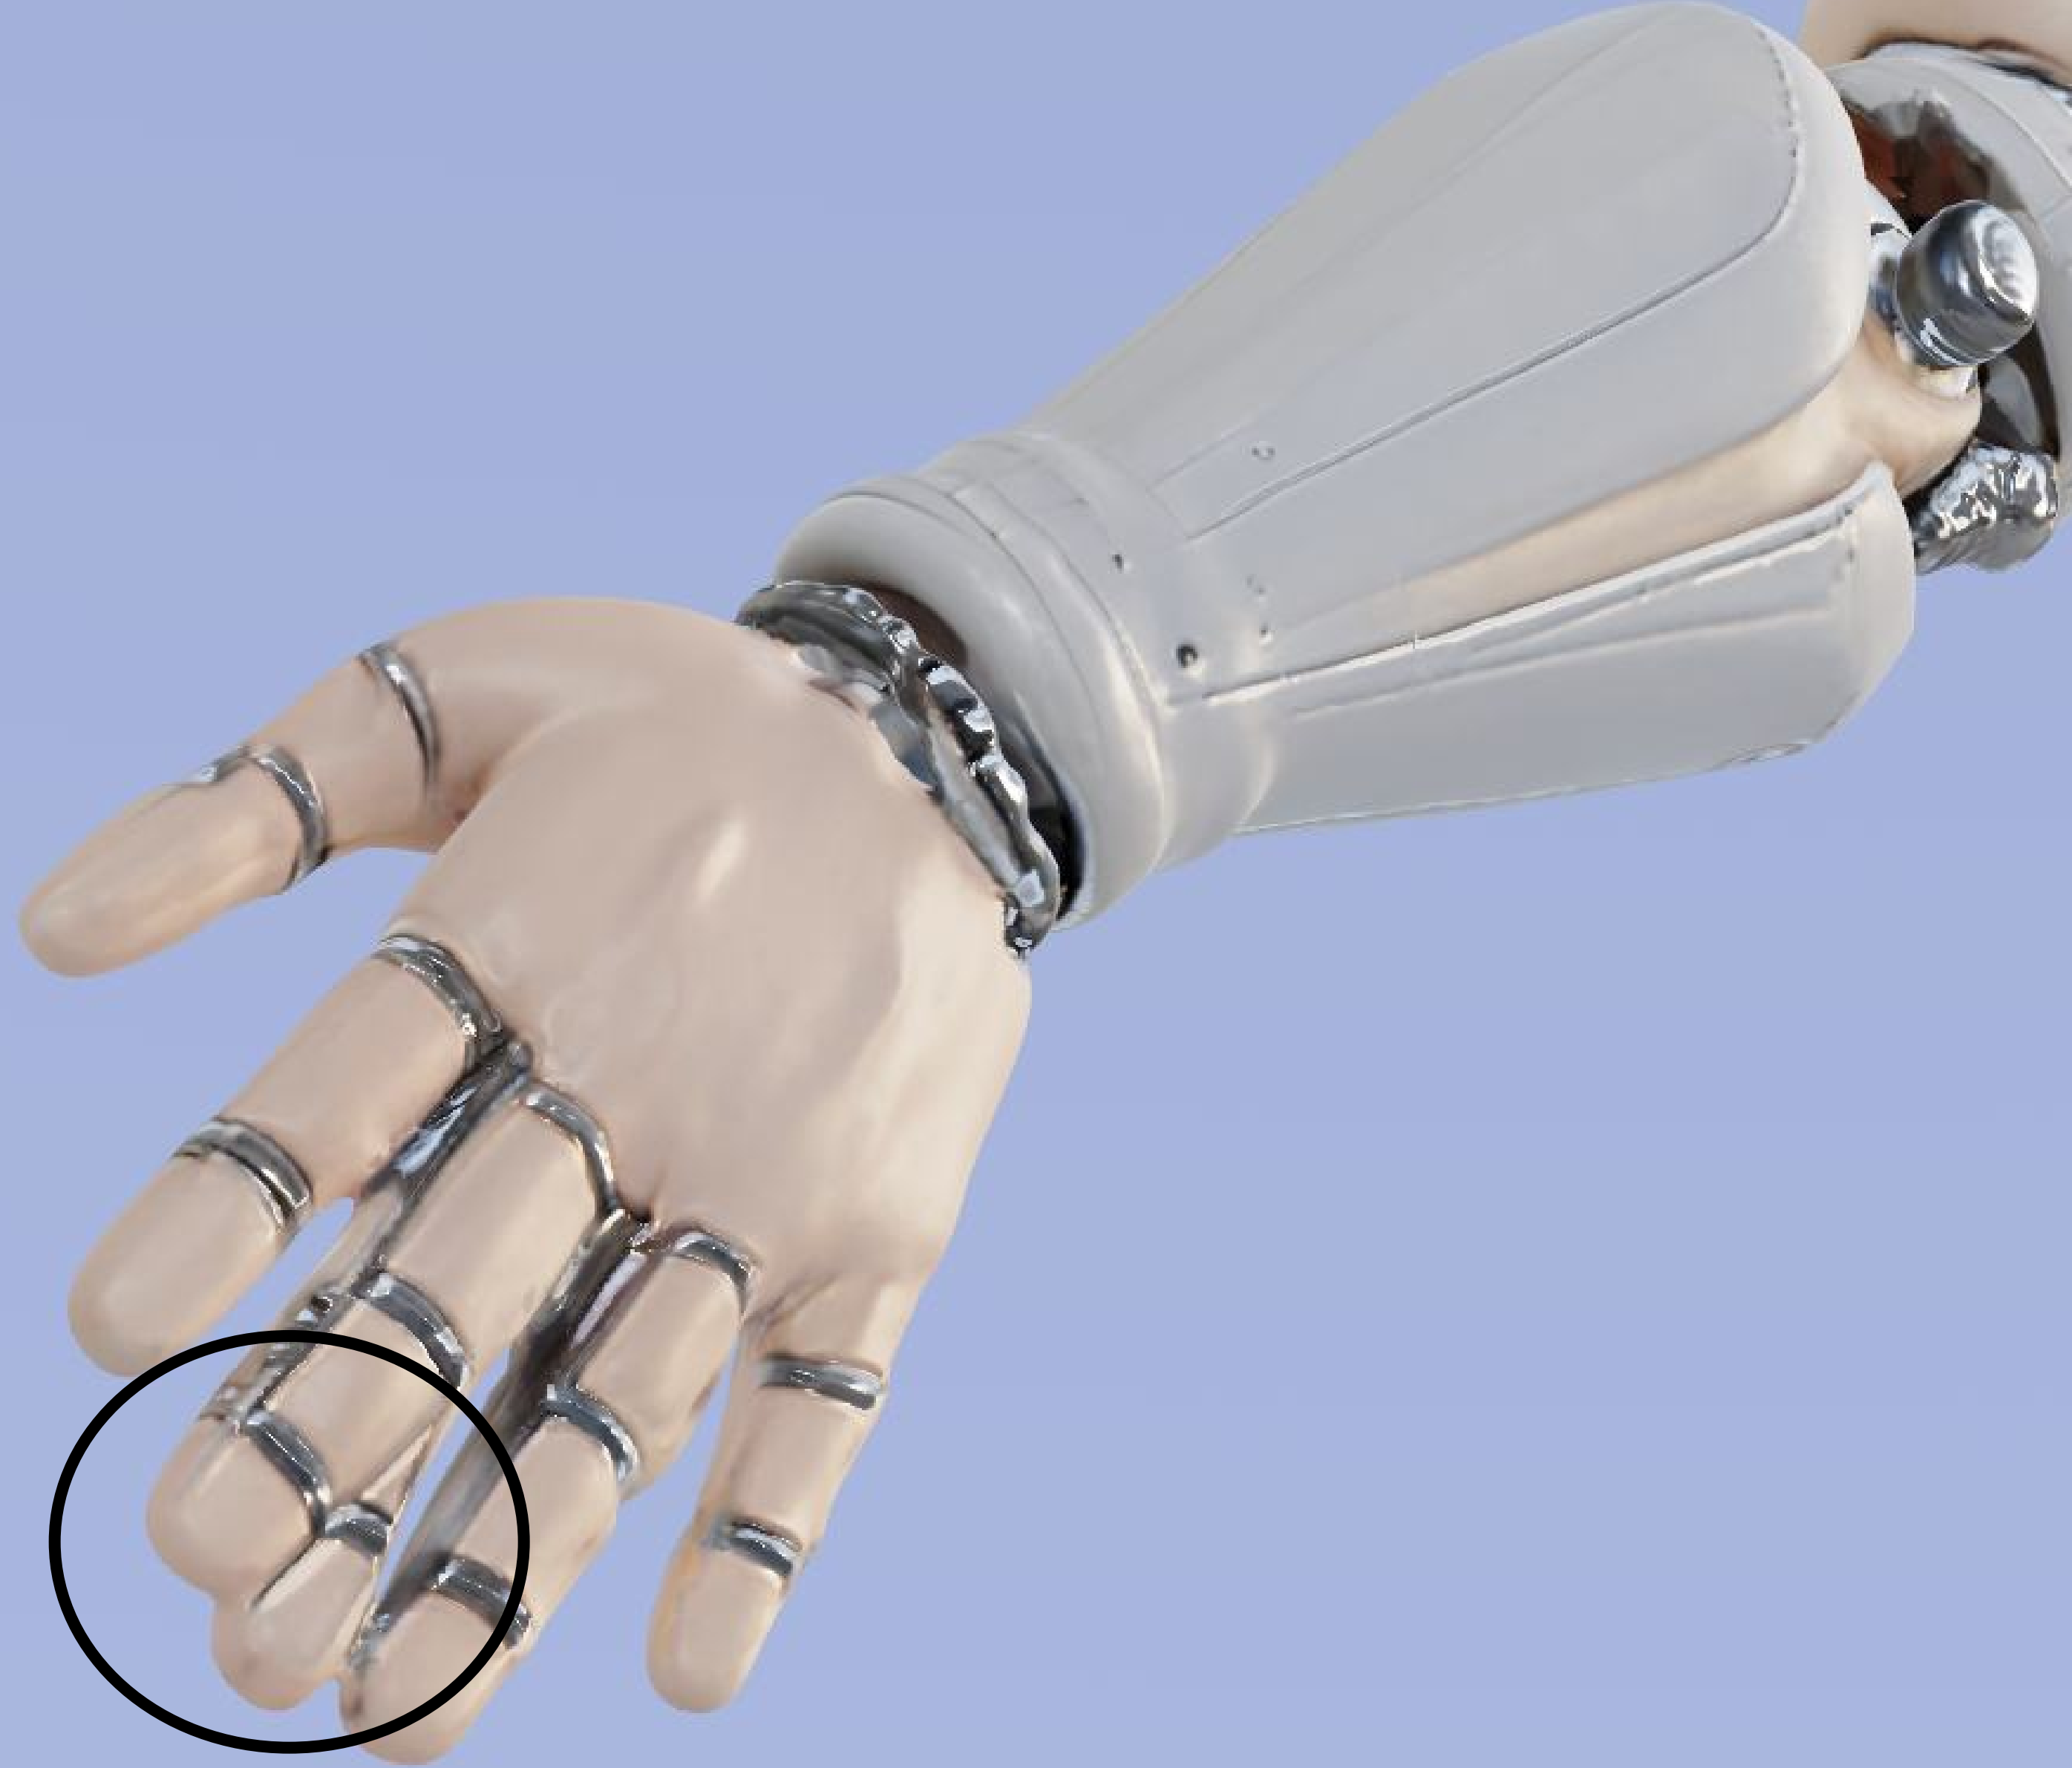

But
AI is not perfect.

It can not create a
51.5mm*42mm*13.5mm
alarm clock enclosure.

Prompt: a 51.5mm*42mm*13.5mm alarm clock enclosure

It creates weird
fingers:

Tripo AI v2.0

Prompt: "prosthetic arm"

AI is good at:

- Fancy imagination
- Prototype
- Decorative Objects

Humans are good at:

- Precise measurements
- Test the products
- Functional Objects
- And giving prompts to AI!

(It's all about how humans
interact with the products.)

what is human-centered design?

Human-centered design (HCD) is a design approach that focuses on the needs, behaviors, and experiences of people who will interact with a product or service. It prioritizes understanding the user's perspective at every stage of the design process, from initial research to prototyping, testing, and implementation. The ultimate goal is to create solutions that are not only functional but also intuitive, enjoyable, and accessible to the people who will use them.

Thanks for listening!

🎃 Happy Halloween
