

Final project warm-up: Evidence of design scavenger hunt

ENGR 11A – Fall 2024

Assigned: Friday, October 25

Due: Tuesday, October 29, 9:35am

Project description

In small groups, go on a scavenger hunt¹ around the Brandeis campus to document evidence of design. Look for and take photos or make drawings of at least one example of *EACH* of the following below. Remember to think about built structures but also services, products, systems. Please be creative! You will get points if you bring in an example that nobody else has found.

Designs for access

1. Evidence of design for navigation without one or more of the 5 senses
2. Evidence of design for forms of assistance, broadly defined
3. Evidence of design for aging, broadly defined
4. Evidence of design for young children (no parks or playgrounds)
5. Evidence of design for wheeled mobile gear (chairs, bikes, strollers, etc.)

Designs against access

6. Evidence of design with physical barriers
7. Evidence of design with a lack of information
8. Evidence of design with an absence of help

Design priorities in the built environment

9. Evidence of design for historical specificity
10. Evidence of design for environmental sustainability
11. Evidence of design for health and well-being
12. Evidence of design for (fill in the blank and provide an example of a design priority that is not listed)

Submission

Make a page on your personal course website to upload and annotate your photos (you may want to resize them to make it easier to view online). Annotations can include more detailed information about the evidence of design you found as well as any broader context—history, articles, or personal experiences.

¹Credit to Prof. Sara Hendren, who originally created this assignment as “Life in the edited city,” and to Prof. Jenna Tonn with whom I revised the assignment.

Grading

Adherence to guidelines	30%
Class participation	20%
Write-up quality	30%
Uniqueness of evidence found	20%
